BETTER AIR, BETTER LIFE

You want to live life to the fullest, sleep soundly at night, and start the day fresh & energized. Your home should be a place where you can switch off and recharge your batteries – whether alone or with your family. The Venta Comfort Plus Airwasher is an especially effective way to boost air quality. It creates healthy humidity and naturally reduces harmful pollutants in the air. So easy you will hardly notice it's there.

FRESH AIR. PURE RELAXATION.
DISCOVER THE **COMFORT PLUS** AIRWASHER.

THE EASY WAY TO HEALTHY INDOOR AIR

There have always been good reasons to choose Venta Airwashers. Easy operation is one of them. While water evaporates to humidify your air, harmful pollutants such as house dust and pollen are naturally reduced or collected in the water inside the Airwasher.

Reliable operation

Simply fill your Comfort Plus Airwasher with fresh tap water to enjoy great air quality. There is even an aromatherapy option. Venta offers six fragrances from relaxing to vitalising.

Intuitive touch display

Simply tap to switch on or off, select speed using + and – symbols. Tap for sleep mode with dimmed display and ultra-quiet speed, or automatic mode which matches speed to current humidity. Controlling your Comfort Plus Airwasher couldn't be easier. Thanks to the integrated hydrostat, the display indicates and controls the air humidity in real time.

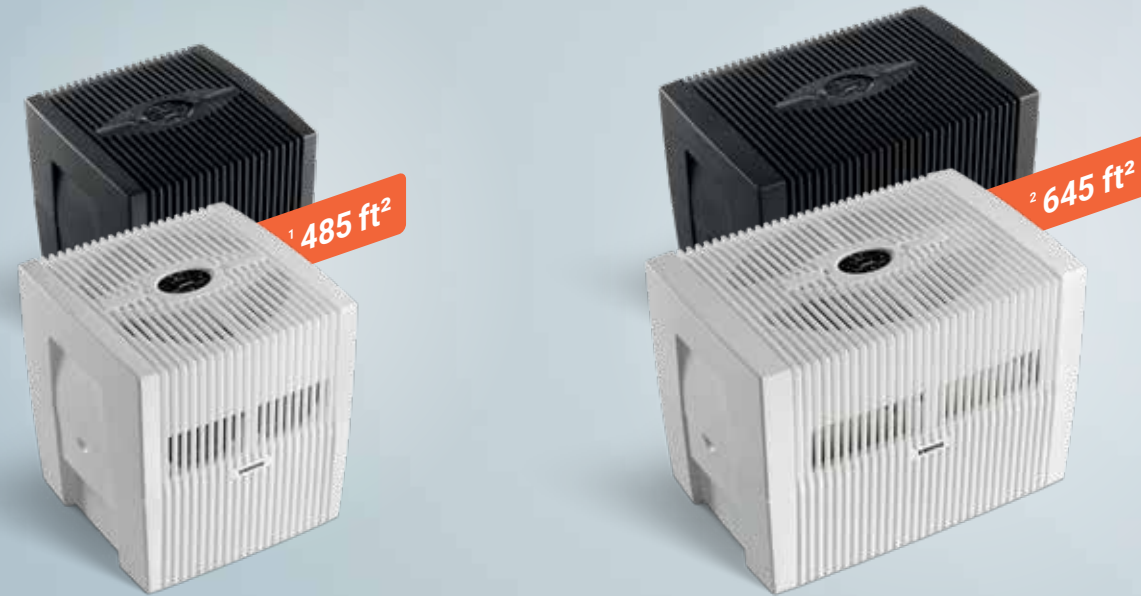

Easy cleaning

Simply lift the electrical unit and fan out of the housing in one movement. To clean your Airwasher every 14 days or so, empty out the water, remove any deposits in the tray, rinse the disk stack with water, fill with fresh water and Venta water treatment additive. Job done.

YOUR BENEFITS:

- Healthy air humidified to an optimal 40–60 %
- Cold evaporative humidification without the use of filters
- Uses tap water
- Removes particles down to 10 µm (e.g. house dust, pollen)
- Naturally reduces harmful pollutants in the air at a humidity level of 40-60%
- Digital hygrostat monitors and controls relative humidity
- Interactive touch display
- Durable and very low-maintenance
- Whisper-quiet operation

Comfort Plus Airwasher LW25

¹ For medium-sized rooms up to 485 ft², e.g. living rooms.

Comfort Plus Airwasher LW45

² For larger rooms up to 645 ft², e.g. open-plan living areas.

INNOVATIVE AIR PURIFICATION

Even an ingenious invention like the first Airwasher developed by Fred Hitzler can be improved when smart and dedicated engineers put their minds to it. Now, the innovative technology in the Comfort Plus ensures faster* humidification and more efficient natural reduction of harmful air pollutants. The novel VentWave 3D disk stack rotates in a water reservoir, and releases hygienically clean water for indoor air humidification. Simultaneously, harmful indoor air pollutants such as house dust and pollen are naturally reduced or captured in the water inside the Airwasher.

* Compared to the Original LW25 or Original LW45.

Innovative evaporation

Each individual disk of the new VentWave™ 3D disk stack is based on a principle found in nature. Just like stomata on the underside of a leaf, thousands of tiny openings ensure that far more water molecules evaporate at the same time compared to a flat surface.

Natural air purification

Our Comfort Plus Airwashers LW25 / LW45 humidify and purify indoor air using only water. No filters required. This cold evaporation is recognized as the best and most hygienic humidifying method. It is also the most natural way of reducing harmful substances in the air.

For rooms
up to 645 ft²

Air humidified to an
optimal 40–60%

Removes particles down to 10 µm
(e.g. house dust, pollen)

Air pollutants naturally reduced
down to 10-µm (at indoor
humidity of 40–60%)

IT STARTED WITH A BRILLIANT IDEA

In 1981, Venta's founder Fred Hitzler invented the Airwasher and revolutionized the market. He recognized that indoor air is often much too dry and also contaminated with harmful pollutants. His solution was the principle of trapping air impurities in water and simultaneously humidifying the air.

Here is how the Venta Airwasher operates

A fan directs the ambient air into the water-filled Airwasher, where it travels through specially arrayed disk stacks. Hygienically clean air evaporates from their surfaces into the room. Simultaneously, the disks trap harmful substances such as dust or pollen, which are then washed off in the water and collected in the Airwasher.

FILL WITH WATER,
SWITCH ON, RELAX.
SIMPLY INGENIOUS.
INGENIOUSLY SIMPLE.

40–60% optimal humidity

Heating removes moisture from the air in your space in the winter, just as air conditioning removes moisture from the air in the summer. That can irritate eyes, mucous membranes and skin. Dry air has also been shown to increase susceptibility to allergens and infections. A Venta Airwasher helps ensure year-round healthy humidity!

”

He said it best himself:

**People should always be able to breathe
fresh air, even indoors.**

“

Fred Hitzler
Venta founder

MARKET LEADERSHIP DRIVEN BY QUALITY

Venta-Luftwäscher GmbH in Weingarten, Germany, is one of Europe’s leading manufacturers of filter-free, combined humidification and air purification appliances for indoor use (source: GfK, Panelmarkt July 2020). Our products are best sellers in Germany, Switzerland, Austria and the Netherlands.

THE SECRET OF OUR SUCCESS:
PRINCIPLES YOU CAN TRUST.

Unique

The Venta method of evaporative humidification and simultaneous air purification requires only water.

Easy

Venta appliances are robust, extremely reliable, user-friendly and very easy to clean.

Efficient

Sustainability is important to us. That’s why we manufacture our products in Germany, carefully selecting materials and packaging. Our products are designed for low energy consumption and ensure practically all components are recyclable.

Venta products are developed with the customer in mind.

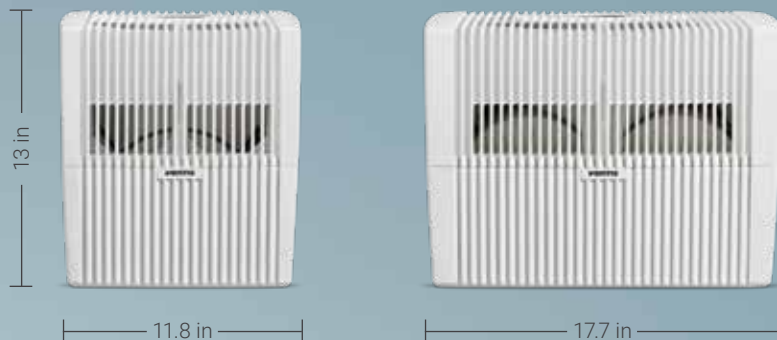

Our customers choose Venta products not because of aggressive advertising, but because of proven quality and performance.

Venta is staffed by problem-solvers committed to providing top Venta service down to the last detail.
