Press Release

New Venta Professional series: only the best for the best air

Venta has been setting the standards for quality indoor air for more than 40 years. Now, the indoor air experts from the German town of Weingarten present their new Professional Series, a high-end product range with top product features and excellent results for indoor air. The Professional Series consists of three models: the AW902 air washer, the AP902 air purifier, and the AH902 2-in-1 device, which is a combination Air Purifier and Airwasher. The new series will be available from March 2021.

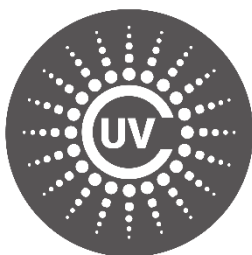

Highest quality for optimal indoor air for healthy breathing at home: That is the mission driving Venta. For the new Professional series, Venta has taken all quality controls to the next level. Only the top components are used in the three new models. That way, discerning customers can enjoy state-of-the-art air treatment technology that is equipped with many features and packaged in an elegant design.

"With the new Professional series, we are offering demanding customers cutting-edge technology for quality indoor air at home," says Andreas Wahlich, CEO of Venta. "When putting the models together, we paid particular attention to meeting current hygiene and cleanliness requirements." The Professional series comes as an Airwasher, Air Purifier, or a two-in-one device for quality air in the home or office.

**The AH902:
Two devices in one**

Airwasher Professional AW902 - quality air for up to 120 m²

**UVC light for optimal
hygiene**

The [Professional AW902](#) is Venta's top Airwasher with the latest technology from the company's development team. It efficiently humidifies the air via patented air humidification and hygiene technology. The VentWave™ 3D plate stack ensures highly efficient cold evaporation. Hygiene is guaranteed twice over: The patented Venta Hygiene Disc minimizes cleaning, prevents limescale build-up, ensures hygienic humidification performance, and eliminates the need for chemical additives. Additionally, the UVC lamp prevents microorganisms, such as viruses, bacteria, and mold spores, from forming and growing in the water and device, without releasing ozone.

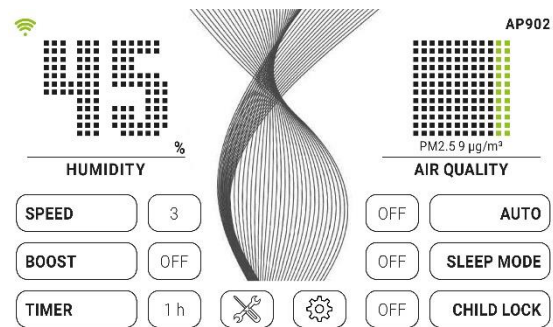

The RRP for the Professional AW902 Airwasher is 999 euros.

[Professional AP902](#) - removes 99.995% of harmful particles from indoor air

The powerful AP902 air purifier eliminates 99.995% of allergens, fine dust, and viruses from indoor air with its unique Nelior Twin Air filter technology and H14 cleanroom filters. The air is cleaned by

two side-mounted filters. The HEPA filters are H14 cleanroom standard per DIN EN 1822. The air purifier creates natural comfort zones in living spaces, which is ideal for allergy sufferers and those prone to respiratory diseases.

The powerful filters remove fine dust (PM 1) as well as particles up to 0.07 micrometers in size. This includes pollen, house dust, and pathogenic viruses. Additionally, the PM2.5 sensor monitors the air quality and rates it using a six-color grading scale according to the international Air Quality Index. All functions of the Professional AP902 can be reached on the touch display as well as on the Venta app.

The RRP for the Professional AP902 air purifier is 999 euros.

Professional AH902 - two-in-one: air humidification by simultaneous air washing and purification

For customers who want the best of both worlds in air treatment, the [Professional AH902](#) is the ideal solution: cleanroom air purification through an H14 filter like the AP902 and purifying like the AW902. The only significant difference from the other two models is the designated room size. Instead of 120 square meters for the AW902 air washer and 75 square meters for the AP902, the AH902 is sufficient for rooms up to 70 square meters - with an assumed room height of 2.5 meters. "The AH902 two-in-one unit is the new flagship in our range for users who place importance on air quality and health and do not want to compromise on quality," says Wahlich. "There is no better way to produce quality air in your own home, apartment, or office."

The RRP for the AH902 is 1,199 euros.
